

# Freelides

## Slide Tubes & Slide Sheets

### Single Patient

Freelides can be used for a multitude of patient handling tasks. The anti-friction tube and sheets reduces skin shear making transfers safer and easier for staff and patients. Patient comfort is increased while staff muscular skeletal injuries are decreased. All Freelides are designed to be wiped down between each use. They are made from 100% polyester with an Anti-Static polyurethane coating.

#### **Features:**

- **Wall Dispenser:** Readily available
- **Heat Seal Edges:** No seams to create friction. New!
- **Versatile:** Can be used for more than 25 SPH tasks
- **Single Patient Use:** Reduces the risk of cross-contamination
- **Cost Effective :** Safe transfers in any locations, on a budget
