

The AeroEase single patient use air lateral transfer mattress is a versatile solution with various functions. Independent laboratory testing has verified its compatibility with low-air loss beds. This mattress features a breathable design that streamlines caregiver tasks, including transfers, boosting, positioning, and proning, all while prioritizing patient safety. Furthermore, the elevated evaporative properties of the breathable AeroEase contribute to maintaining an ideal microclimate, allowing for safe use under patients throughout the day. The AeroEase guarantee's that patients have a secure, pleasant, and respectful encounter. Featuring a firm perimeter and strap, provides individuals with a strong sense of support, comfort, and safety. Additionally, these devices effectively reduce friction and skin shear by seamlessly moving patients from one surface to another, all while gliding effortlessly on an air cushion. 1100lbs. Weight Capacity.

## AeroEase Air Lateral Transfer Mattress

- **Low Air Loss Top Layer:** Removing the typical extra layer improves both breathability and pressure relief.
- **Enhances Caregiver Productivity:** Utilizes fewer caregivers, enhancing staff productivity, with an 1100lbs weight capacity.
- **Elevates patient comfort and upholds dignity:** Minimizes skin shear for more comfort and safety.
- **Minimizes the risk of injuries to caregivers:** Decreases the force required to move patients by more than 80%.
- **Radiolucent and MRI:** This mattress is designed to be compatible with radiology and MRI procedures.
- **Multiple Sizes:** Three sizes, 34", 39", and 50".

Repositioning

Double Turner (Tri or Twin)

Limb Lifter (Band)

Double Amputee (sit-on)

Walking Pants

The **AeroEase-Seated** single patient use air lateral transfer mattress, offers the same advantages as the standard AeroEase mattress, but with an extra feature for seated transfers using a patient lift. Its multiloop lifting straps are specifically designed to connect with passive floor lifts and ceiling lifts. Intended for facility-wide use, it serves as an excellent solution for units lacking ceiling lift equipment. The fabric's ventilation ensures a comfortable environment and works with low air loss beds, making it suitable for extended use under patients. It boasts an impressive weight capacity of 1100 pounds, ensuring exceptional durability.

## AeroEase-Seated All-in One Repositioning - Lateral Transfers – Seated transfers

- **Streamlined Inventory Management:** One versatile product, reducing shelf space requirements.
- **Improved Efficiency:** Minimizing injuries and decision time, enabling more tasks with a single solution.
- **Bariatric Capacity :** One product does more with a 1100lbs weight regardless of size.
- **Enhanced comfort :** Gentle controlled movements, and increased bed coverage.
- **Multiple Sizes:** Three sizes, 34", 39", and 50".
